

# Be A Part of the Solution

## Join the Breast Cancer Collaborative Registry

The Breast Cancer Collaborative Registry develops a national breast cancer resource that collects information to be used for breast cancer prevention and treatment strategies.

It's easy to help! You have to be 19 or older, have the ability to provide consent and meet one or more of the following criteria:

- Personal diagnosis or history of breast cancer
- Positive results for BRAC1/BRAC2 or other genetic factors
- Blood relatives with a diagnosis of, or history of breast cancer (parent, sibling, children, aunt/uncle, first cousins).

If you are interested in participating or want more information about the registry, contact the MVHS Research Department at 315-624-5705 or email [msmith6@mvhealthsystem.org](mailto:msmith6@mvhealthsystem.org).

Male or female, help be a part of the solution.
